

## Geometry Lab: Instructions

---

When you're ready to submit your solution, go to the [assignments list](#).

In this lab, you will be performing image manipulations using linear algebra. Remember, without geometry, life is pointless.

To complete this assignment, please carefully follow these instructions:

1. [Download this ZIP archive](#)
2. Unzip the archive into your `matrix` directory.
3. Read the `geometry.pdf` file.
4. Try out your solutions in the Python REPL. Test them thoroughly.
5. Fill out the stencil, `geometry.py`.
6. Run `python3 submit_geometry.py` to submit. You will need a one-time password to submit this assignment. It's located [on this page](#).

Have fun!
